Yukon Bureau of Statistics

Yukon Employment
October 2012

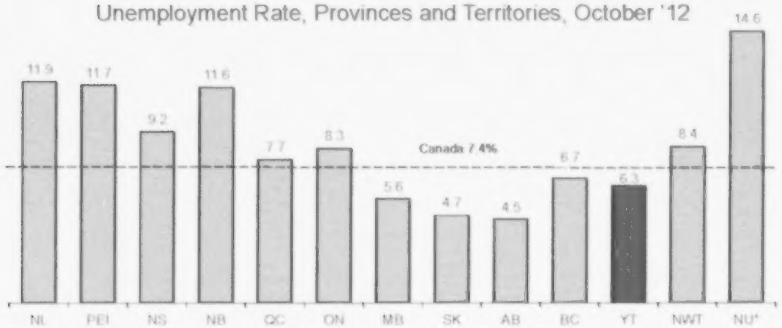
Highlights:

- Yukon's October unemployment rate at 6.3% remained the same as September.
- The national unemployment rate, 7.4%, also remained the same compared to one month earlier.
- Yukon's October labour force decreased by 100 compared to September of this year, while number of employed and number of unemployed remained the same.

October 2012 Yukon Employment at a Glance

Labour force	20,500
Employed	19,300
Unemployed	1,300
Unemployment Rate	6.3%

Unemployment Rate, Provinces and Territories, October '12



*Nunavut's unemployment rate is available only as an unadjusted estimate.

Age, Full Time and Part Time 6
Industry and Class of Worker 7
Definitions 8

- Yukon's employment in the Goods-producing sector (3,700 workers) remained strong in October. The sector saw an increase of 700 compared to October of last year and an increase of 100 compared to last month.
- In October of this year, 86.7% of all employed workers were full-time. This is the second-highest rate among the provinces and territories.
- Of the 19,600 employed workers in October, 37.2% were public employees, 48.0% were private employees and 14.8% were self-employed.
- Nationally, following two consecutive months of increases, employment in October was virtually unchanged and the unemployment rate remained at 7.4%. Public sector employees increased, offset by a decline in private sector employment.

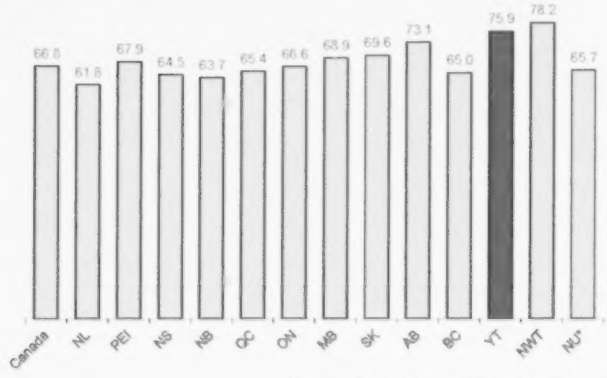
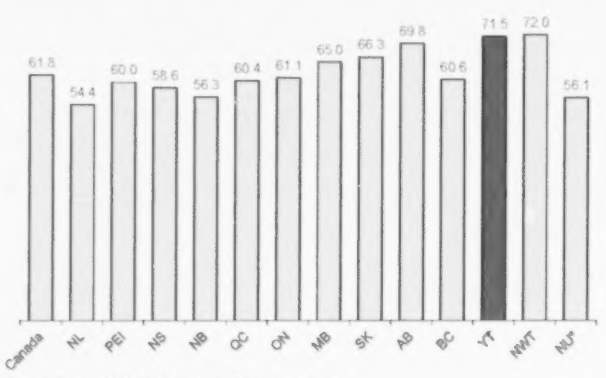
Comparisons with Canada - Snapshot

Participation Rate, October '12



Employment Rate, October '12



*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in October 2012 was 75.9%, second-highest in Canada.

Yukon's October employment rate (which measures the percent of the population which is employed), at 71.5%, is also second-highest in Canada, due to the high participation rates.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 75.9% of Yukoners age 15 and over were employed or were seeking employment in October, slightly below the October '11 rate of 74.9%.

Yukon's participation rate began to decline in June 2011 as the percentage of Yukoners participating in the labour force declined for several months before rebounding in the fall/winter of 2011/12. The January 2012 rate of 78.3% was the highest it had been since June of 2002.

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Participation Rate, Oct '10 - Oct '12

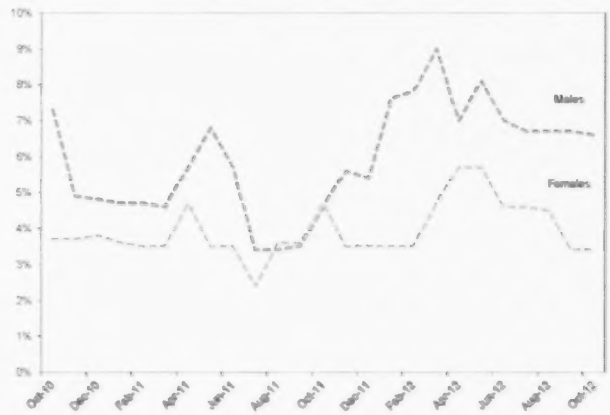
Unemployment Rate, 25+, Males and Females, Oct '10 - Oct '12



Labour Force, *Unadjusted* and Annual, age 15+

'Seasonally adjusted' refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted should not be made. For more information, see definitions on pg 8.

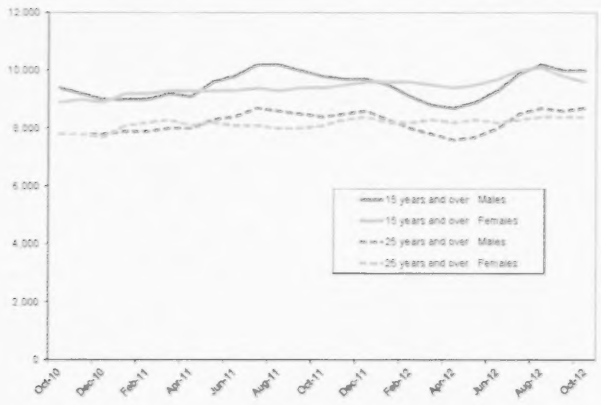
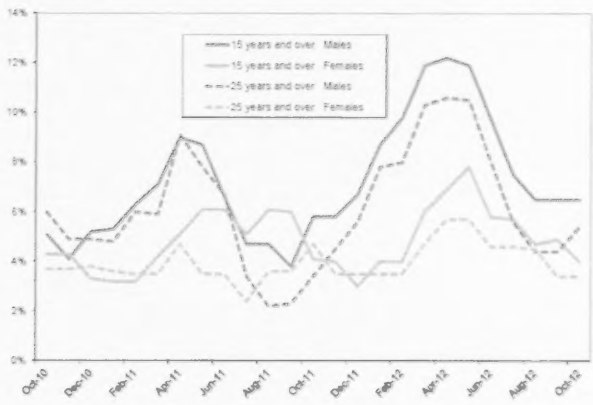
Employment by Age and Sex, Oct '10 - Oct '12

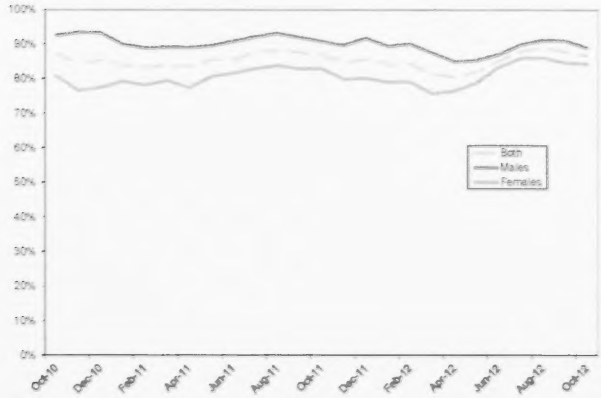


Unemployment Rate by Age and Sex, Oct '10 - Oct '12



Unadjusted, Full-time and Part-time Workers, October '12

Full-time employment as a percentage of all employment
Age 15+, Oct '10 - Oct '12



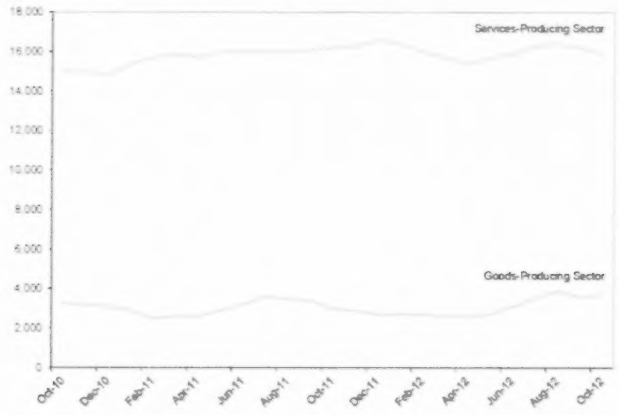
- Comparing October to September 2012 , the unemployment rate remained the same for males (6.5%) and decreased by 0.9 percentage points for females (4.0%) in the 15+ age categories. Males in the 25+ age category increased from 4.4% in September to 5.4% in October. Females in the 25+ age group remained unchanged from September at 3.4%.
- 17,000, or 86.7%, of Yukon's 15+ workers were full-time in October.
- 89.0% of employed males held full-time employment, while 84.4% of females did.
- Nationally, 81.2% of employed Canadians worked full time in October.
- Yukon held the second-highest percentage of workers with full-time jobs in Canada - only behind the Northwest Territories.

Employment, *Unadjusted,* by Industry, October '12

	Both sexes	Males	Females
Total employed	19,600	10,000	9,600
Goods-producing sector	3,700	3,100	600
Forestry, fishing, mining, oil and gas	800	600	200
Construction	2,200	1,900	300
Services-producing sector	15,900	6,900	9,000
Trade	2,200	1,200	1,000
Transportation and warehousing	1,000	700	300
Finance, insurance, real estate and leasing	800	400	400
Professional, scientific and technical services	1,100	500	600
Business, building and other support services	700	300	400
Educational services	1,300	400	900
Health care and social assistance	2,400	500	1,900
Information, culture and recreation	1,000	500	500
Accommodation and food services	1,400	500	900
Other services	700	300	400
Public administration	3,400	1,500	1,900

Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

Goods and Services-Producing Sectors, Employment, Oct '10 - Oct '12



- In October, 15,900, or 81.1% of working Yukoners were employed in the service-producing sector; 3,700, or 18.9% were employed in the goods-producing sector.
- 59.5% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 56.6% of workers in Yukon's services-producing sector, only 16.2% of goods-producing sector workers were female.
- Compared to last October, employment in the goods-producing sector was up 700 workers, or 23.3%, to 3,700; employment in the services-producing sector was down by 300 workers, or 1.9%, to 15,900.

Goods and services producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

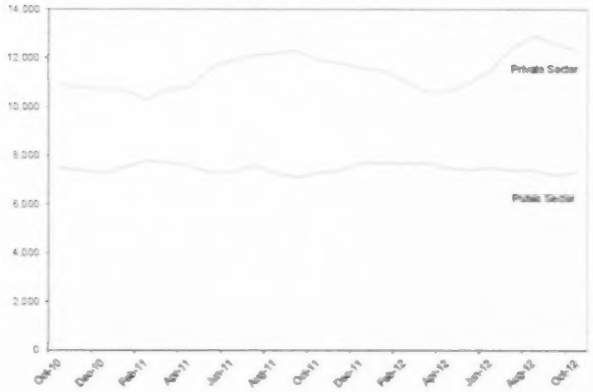
Public and Private Sectors, *Unadjusted,* October '12

	Both sexes	Males	Females
Total Employed	19,600	10,000	9,600
Public employees	7,300	2,800	4,400
Total private sector	12,300	7,200	5,200
Private employees	9,400	5,200	4,200
Self-employed	2,900	2,000	1,000

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In October, 37.2% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 23.6% were self-employed.
- Private sector employment was up by 400, or 3.4% from last October, and public sector employment remained the same.

Public/Private Sector Employment, Oct '10 - Oct '12



Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as "employment/population ratio," it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April's unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories' figures are not included in the calculation of Canada's numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
